### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

In the claims:

Claim 7, line 35: "the or each slave station in the second" has been changed to "the at least one slave station in the second".

3. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or suggest, alone or in a combination, among other things, at least a mast station as a whole, the combination of elements and features, which includes means accessing the quality of at least one slave station in the first state, transmitting acknowledgement when retransmitting is not required, having lower quality communication than the quality of at least one slave station in the second state; not transmitting acknowledgement when retransmitting is not required and transmitting negative acknowledgement when retransmitting is required as recited in the claims.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2637

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Gajjar (US Patent 4,585,685) describes a method for improving message reception from multiple sources comprising transmitting error correction functions only if the message word is invalidly received in FIG.1.

Stirling et al. (US Patent 5,923,662) describes a local communication system including a first station transmits a directed type of message to individual ones of the other stations, or transmits a broadcast type of message to all or a subset of the other stations. For a broadcast message, any receiving station unable to accept the message transmits a common negative acknowledgment signal and the first station re-transmits the message up to five times.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edith M. Chang whose telephone number is 571-272-3041. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jay K. Patel can be reached on 571-272-2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
